Comfort Seat & Backrest

Kit to fit Perception sit-on top kayaks

Detachable outfitting system designed specifically for sit-on top kayaks. A padded seat and high backrest provide a comfortable and supportive paddling position.

PLEASE READ THESE INSTRUCTIONS CAREFULLY BEFORE FITTING!

Step 1 - Seat fixing points

The seat attaches to the kayak via two forward and two rear fixing straps. Loosen the straps before fitting and use the clips to secure each strap to an accessory loop on the kayak. Ignore the deck loops immediately to each side of the backrest (these are for thigh straps - see below).

Step 2 - Adjusting strap tension

Both rear straps have two tensioning buckles each. Always adjust the lowest of these so that the lower buckles sit level with the back of the kayak behind the backrest. Then tighten the upper of the rear buckles and those on the front straps to fix the desired position of the seat and backrest.

ALWAYS RINSE IN FRESH WATER AFTER USE & REMOVE BEFORE TRANSPORTATION!

Additional sit-on top accessories

Paddle Leash:

A paddle leash can be used to keep your paddle securely attached to your sit-on top kayak. The leash attaches to the kayak and then fastens around a paddle shaft. The leash doesn't interfere with normal paddling and means that if you fall off in the surf, you only need keep hold of the kayak as your paddle can't float away!

Thigh Straps:

For extra control and grip, our thigh strap system can be added to your sit-on kayak. Once fitted, they pull over your thighs and can be adjusted for the perfect fit.
