

YAK SHELF

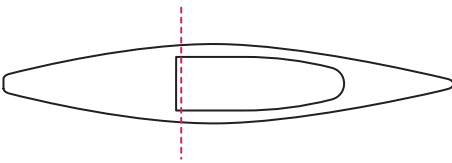

INSTRUCTION MANUAL

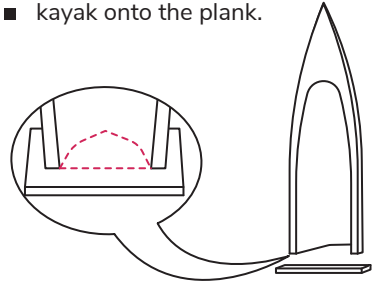

YAK SHELF

- 1.** Cut the back of your Yakoff, right behind the seat.

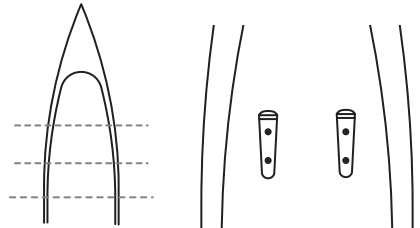

- 2.** Place the Yakoff onto a wooden plank. Trace the edges of the kayak onto the plank.

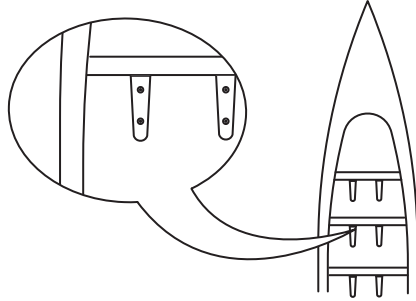

- 3.** Cut along the traced line to create your Yakshelf base.

- 4.** Measure out where you want your shelves. Install shelf brackets.

- 5.** Measure and cut your wood 2x4s to the correct size, insert, and secure them using screws.

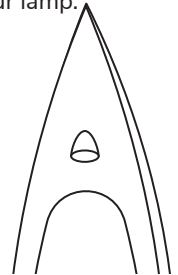

TIP #1
Make sure those bad boys are level before ya screw 'em.

- 6.** Bore a hole at the top of your Yakoff. This is where the light will go.

TIP #2
Don't make that hole huge. Huge holes won't work.

- 7.** Make sure your electrical chord has a direct line to an outlet. Then mount your lamp.

- 8.** That's it! You've turned your Yakoff into a magnificent looking Yakshelf. That you can put stuff in. Like books or taxidermy.
